We are the Manufacturer...

With our in-house capabilities, Signature Streetscapes provides customers with first-rate service and products at unbeatable prices. We are also able to accommodate requests that other companies simply cannot or will not. Call today to find out what we can do for you!

Warranty

Signature Streetscapes products are warranted to be free from defects in both material and workmanship for one year. We will replace or repair all defective products upon return freight prepaid. Our warranty does not cover costs associated with labor for installation or products damaged due to improper use or installation.

Lead-Times

Most of our products are custom-built to order, while others are standard components in-stock ready for immediate shipment. We pride ourselves on scheduling accurate lead times and meeting those commitments for our customers.

Design Services

Our in-house design team is here to assist **you**. Most of our design services are offered free of charge to provide you with accurate specification drawings for approval by your committee or board.

Shipping

We take great pride in the careful inspection and packaging of each order to avoid shortages or damage. We also align ourselves with industry leading carriers to secure the most competitive shipping rates. However, we realize that occasional mishaps may occur, so please carefully inspect your shipment upon arrival for any shortages or damaged items and note them with the carrier before signing the freight bill. Notify Signature Streetscapes immediately if a problem arises and we will be happy to assist you.

Signature Streetscapes manufactures high quality, upscale amenities for residential communities at affordable manufacturer direct prices. With over 60 years of sign manufacturing experience, Signature Streetscapes is your complete source for decorative streetlights and sign posts, custom street signs, mailboxes and wayfinding signage, as well as bronze and aluminum plaques. Our high quality, durable and affordable amenities allow neighborhoods to **create a distinguished, uniform look throughout their development.** We simplify the process for organizations to add the finishing touch to their projects.

Signature Streetscapes

Full line of decorative signage, lighting & ornamental amenities designed specifically for upscale residential homes & downtown main street applications

Port City Architectural Signage

Port City manufactures a complete line of signage for golf courses around the world. Sold through our dealer network

TYPE-2

We manufacture site furnishings made of 97% pure recycled plastic. Our specialty is building waste and recycling enclosures

FLORENCE

We now offer Florence products, including USPS approved mailboxes, private use mailboxes, and many accessories.

Streetname Sign Frames

Reflective Blade Inserts sold separately, see page 10

Classic Blade Trims

Sign trims are designed to hold 36" x 6" and 36" x 9" reflective vinyl street blades. Each trim is made from a combination of extruded and cast aluminum materials with a decorative profile for a strong and attractive look. Sign trims are a cost effective way to display your street name signs with a frame while maintaining reflectivity requirements. Call one of our friendly customer service representatives for assistance with creating custom sign assemblies.

In addition to being mounted to our standard posts, Wing Brackets can also be fastened to walls, concrete, wood or existing posts with 3/4" strapping bolts, lag screws or spikes. Provide us with information on your mounting application and we can send a hardware package that suits your needs. Additional costs for hardware and fasteners may apply.

Six Street Name Styles to choose from...

Cast Aluminum

Solid "sand cast" aluminum street blades are a striking addition to any neighborhood. Each sign is finished with a 3-step urethane coating process that assures long lasting beauty and service. These dimensional signs can incorporate logos or custom coloring in addition to a variety of mounting applications. Call us for more information and we can provide you with scale drawings and specifications for presentation to your committee.

Classic Blade Trims

Sign trims are designed to hold 36" x 6" and 36" x 9" reflective vinyl street blades. Each trim is made from a combination of extruded and cast aluminum materials with a decorative profile for a strong and attractive look. Sign trims are a cost effective way to display your street name signs with a frame while maintaining reflectivity requirements. Call one of our friendly customer service representatives for assistance with creating custom sign assemblies.

Collar Hanger Arms

The Collar Hanger Arm fits around a 3" diameter sign pole and will hold signs from 18" to 42" in length, .22" thick. Add our reflective street blades (see page 10) or reuse your existing signs. Choose from a standard Collar Hanger Arm, or one of four scroll options below to fit your style. Let us help you design your custom historical signs, call us today!

Scroll Bracket Arm

The scroll bracket arm will attach signs from 18" to 42" in length and .22" thick to any round or square sign post. Choose from one of four scroll options pictured below. Ask about our blade design services, we can help you create an elegant impression in your neighborhood. Standard and custom colors available.

Post Top Mounting

Create a classic looking streetscape with this economical sign system. All components are made from rust-free aluminum. Choose your vinyl street blade from the options on page 10. Our "Signature" or "Classic" setup options allow for a variety of sign sizes. Recommended sign sizes listed below, or call us for custom setups and sign material thickness options.

Wing Brackets

These brackets are made of solid rust free aluminum and powder coated with any of our standard color options. Large and small brackets are available for a variety of sign sizes. Brackets hold flat .080 or extruded aluminum vinyl street signs; see page 10 for available vinyl sign size and color options. Brackets are also available in a raw "mill finish" if you prefer to finish.

Reflective Vinyl Sign Blades

Reflective Street Name Sign Blades

All Signature Streetscapes aluminum street signs are manufactured per U.S. Bureau of Public Roads Standards and are in accordance with the Federal Standard Highway Signs Manual. The aluminum substrate base for our sign blanks is chemically treated to add longer life and weather resistance. Aluminum Blanks are covered with reflective material on both sides. Choose from two grades of reflective material (High Intensity & DG3) in the five standard highway colors shown below.

High Intensity Prismatic

Type: High Intensity reflective sheeting

Best for: all applications - Highly reflective at wide angles to approaching traffic, more durable than engineer grade. Estimated lifespan 8 to 10 years

Reflectivity: Meets all MUTCD Guidelines

Diamond Grade™ DG3

Type: full cube prismatic reflective sheeting

Best for: all applications - delivers optimal performance at all sign distances, as well as all light weather conditions. Estimated Lifespan 10 to 12 years

Reflectivity: proposed ASTM Type XI

LETTER CASE CHANGES

According to new federal law, a combination of both upper and lower case letters is more legible to approaching vehicles. The new rules can be found in the Federal Highway Administration (FHA) manual. The deadline for cities and communities to phase out existing uppercase only signs is

January 22, 2018

Visit our website for updated information regarding FHA and MUTCD guidelines

Flat Reflective Blade Options

Our Flat Reflective Street Name Sign Blanks are manufactured from .080" gauge aluminum with reflective material on both sides and feature 3/4" radius corners. We overlay blanks with a 3M 3630/3680 Scotchcal translucent film with a matte finish. Film is rated for 6 years of outdoor durability. No holes are punched in the signs.

Blade Size	High Intensity	DG3 Diamond Grade
24" x 6"	HI-46	DG-46
30" x 6"	HI-06	DG-06
36" x 6" *FITS CLASSIC TRIM	HI-66	DG-66

30" x 9"	HI-09	DG-09
36" x 9" *FITS CLASSIC TRIM	HI-69	DG-69
42" x 9"	HI-29	DG-29

Extruded Reflective Blade Options

Our Extruded Aluminum Sign Blanks are manufactured from T-6063 aluminum extrusions. Anodized Aluminum Blanks are bare metal that has been chemically treated to meet ASTM B 499 specifications as pre-treatment for paint or sheeting applications. We overlay blanks with a 3M 3630/3680 Scotchcal translucent film with a matte finish. Film is rated for 6 years of outdoor durability. No holes are punched in the signs.

Traffic Signs

MUTCD approved signage, call us for more options...

View all Traffic Signs available on our website
SHOPsignaturestreetscapes.com

Made from heavy duty .080 aluminum and high intensity prismatic reflective vinyl to meet all MUTCD codes. Signature Streetscapes stocks all signs in "High Intensity Prismatic" reflective sheeting, but can also provide "DG3 Diamond Grade" - call for pricing & lead-times. Traffic signs can also have the unfinished backs coated to match your sign poles and accessories at an additional cost (see page 14). Contact our customer service department for more information. For even more standard sign options, or to create a custom layout, call us directly and we can provide you with pricing and full color drawings for approval.

REFLECTIVITY REQUIREMENTS

In general terms, retro reflectivity describes the efficiency of a material to redirect light back to its source, which gives signs and pavement markings a brighter appearance at night from the driver's perspective. For more information visit the MUTCD website or contact your local authority for sign requirements.

Signature Streetscapes uses "High Intensity Prismatic" & "Diamond Grade" reflective sheeting, which meets all national requirements set by the MUTCD and FHWA. Additional reflective sheeting options are available upon request, call our customer service department for details and pricing.

Signature Streetscapes' complete selection of traffic signs includes regulatory, warning, guide, and recreation signs, as well as construction, school, railroad, and bicycle signs. Whether you need a complete sign package for a comprehensive transportation plan, or just an important replacement sign, our customizable and well-made signage products not only get the job done, but adhere to all regulatory standards. All traffic signs are available in multiple grades of reflective sheeting to best serve your specific project needs.

Looking for something you don't see here? Contact Us and we'll be happy to assist you.

Decorative Sign Frames

“Extruded Frames” for the following sign sizes...

Solid extruded aluminum frames enhance and protect your signs at the same time. Frames are powder-coated to match the sign pole, and include all necessary stainless steel mounting hardware for installation of standard .080 aluminum traffic signs. We can also custom build frames to fit almost any sign, call us for more information and pricing. CUSTOM SIZES AVAILABLE, CALL FOR PRICING.

BREAKAWAY POST DEADLINE

In 2000 the MUTCD made breakaway sign supports a "shall" condition for supports within the **clear zone** of all streets and highways in the United States. FHWA intends to limit the mandate for retrofitting breakaway supports on non-National Highway System routes to those posted at 50 mph or greater, and has set a deadline of January 2013* to accomplish the retrofit of existing sign posts. Any new sign post installed after the January 2013 Breakaway Post Deadline shall be breakaway compliant on **any and all speed roads**.

Post installation methods...

V-Loc Breakaway

For use in clear zones to make 3" & 4" Smooth and Fluted tubing breakaway compliant

Direct Burial Posts

Designed for use with concrete installation. We recommend 24" of post burial. Size and depth of concrete varies according to local soil conditions. Concrete foundations should extend above ground level and be larger in diameter than the base, to prevent damage and ensure the finish will be protected for years to come.

Surface Mount Posts

Designed to be used when pole is mounted above grade and fastened with anchors or "J-bolts" in concrete. Fasteners are cast integral with foundation. Call ahead and we can send a hole placement template to match the bolt patterns on our surface mounted bases for use when pouring concrete footers.

See page 37

Bulk Post Pricing, call for volume discounts

Signature Streetscapes offers significant discounts on both powder coated and mill finish (raw/uncoated) material when ordered in bulk. Call our customer service department for more information on placing high volume orders. Custom lengths also available upon request.

NEED SPECIAL HARDWARE?

We understand that when building custom sign fixtures that sometimes the standard hardware package may not always fit your needs. It is important to us that when your products arrive everything required to properly mount your sign is included in shipping. Please let us know at the time of order if you have any specific hardware or mounting style requirements. In almost all cases we can suggest and provide hardware and mounting solutions to fit your needs.

V-LOC BREAKAWAY POST ANCHOR SYSTEM

FHWA approved breakaway options for a variety of post styles including our fluted and smooth aluminum sign poles shown on page 15.

Decorative Post Finials

Popular Finials for both 3" & 4" Posts

Signature Streetscapes stocks our most popular finial styles shown below in "Mill" and "Gloss Black" powder-coat finishes. Finials are secured to posts with provided stainless steel set screws. The finials shown below are available for both 3" & 4" aluminum round and square posts shown on page 15. Additional details on finial height, weight and other specification data can be found on our website at www.signaturestreetscapes.com/finials-bases.

Theme Finials for 3" Diameter Poles

Theme Finials are a great way to add character to your decorative sign poles. All "Theme Finials" are designed to fit 3" diameter poles, but can be attached to 4" diameter poles with our "4x3 Reducer Cap" (shown on page 38). Additional details on finial height, weight and other specification data can be found on our website at www.signaturestreetscapes.com/finials-bases.

Bases for 3" Diameter Poles

Signature Streetscapes manufactures cast aluminum pole bases to fit both 3" & 4" diameter posts. Each base is coated with a durable powder-coat finish and uses stainless steel hardware for securing to the post. Additional specification data on all post bases is available on our website at www.signaturestreetscapes.com/bases.

"Solid" or "Split" Bases

Signature Streetscapes casts a variety of decorative bases in two different styles, "Split" and "Solid". Bases in the above chart are noted with a (*) when they are constructed with a "Split" design. All other bases are of "Solid" one-piece construction.

Split Base

Easy to install, these bases wrap around new or existing poles and lock together with stainless steel fasteners.

Solid Base

Slides over the top of pole and rests on the ground or concrete pad. Bases are locked to the pole with stainless steel set screws.

MOUNTING SPIKES ARE PAINTED BLACK

Signs are available with the color options shown below, or call for custom color matching at an additional charge. Plaques are finished with satin polish raised areas, which expose the rich metal surface. Aluminum plaques can also have the raised areas painted gold. Every plaque is clear coated with our special formula, ultra hard urethane, to ensure a long lasting finish even in the harshest environments. Call our customer service department with help placing your order, or you can design and order on our website.

Additional discounts available for bulk orders, call for prices and information.

Custom Letter & Number Fonts & Sizes...

Signature Streetscapes' standard font used on all custom home address plaques is a "Century Old Style" serif font. However, we have the capability to customize any of our plaques with custom letter/number fonts upon request. We can also accommodate special character sizes to meet your needs. Call us for more information and we will be happy to assist you with a product rendering for your approval. Additional charges may apply for custom fonts.

Room Number Signs

Small number plaques are ideal for room identification and entry ways. Each plaque is capable of holding up to four numbers, and can be finished with antique bronze or pewter aluminum as shown below. Signs are direct mounted to a flat surface, standard hardware is provided. Call for more information on custom layouts and colors.

Cast Bronze & Aluminum Plaques

How to Order Cast Plaques...

Need a plaque for a special occasion, dedication, memorial or custom application? We can assist you through the design process including helping choose the material, size and layout that best fits your needs. Customers are provided with computer rendered drawings of their plaque to view before it is ever cast. Our photo polymer pattern process creates the custom designed pattern directly from the computer approval drawing, eliminating the possibility of misspellings or setup errors. This also allows us to incorporate custom graphics, special fonts, logos or other custom characters at no additional charge. We manufacture and finish all plaques in-house allowing us to offer our customers factory-direct pricing. Call us for details or view our website for details on ordering custom plaques.

SIGNATURE STREETSCAPES WILL PROVIDE SCALE CUSTOMER APPROVAL DRAWINGS BY E-MAIL ON ALL CUSTOM CAST PLAQUE ORDERS

How to price custom size & shape plaques...

Signature Streetscapes does not charge our customers for custom sizes or shapes. For a size not shown, use the next largest plaque size from the list above. The same applies for custom shapes and circles as shown in the examples to the right. Simply take the length and width of the plaque you require and follow the instructions shown to the right to determine the item you need. Send us files and we can help you visualize the plaque your need with full color renderings.

PRICE AS 10" x 10"
CAST ALUMINUM
ITEM I.D. - PQAL-10x10

PRICE AS 20" x 12"
CAST BRONZE
ITEM I.D. - PQBZ-20x12

Custom Shapes

Have a strange or unique shape? No problem! No additional setup or pattern charges will be added to your order. We can even help you create the artwork required to manufacture the plaque if you do not already have it.

Etched Metal Photo

This process uses a photo-sensitive aluminum sheet, available in natural aluminum or gold-tone. The photo is produced as a permanent black image on the plate. This method can be used in both interior and exterior applications.

Alumaticolor Photos

Alumaticolor technology embeds UV resistant dyes into the anodic layer of anodized aluminum and has applications limited only by the imagination. Call us for artwork requirements and prices.

Background Textures

All our plaques are manufactured with a standard leatherette background texture. Other textures are available upon request and include: pebble, travertine & sculptured. Call for details and prices.

Podium Style Mount

Podium style mounted plaques allow for angled viewing. Plaques are secured to podiums with provided stainless steel hardware. A variety of post profiles and decorative options are available.

Add your Logo

Provide us with production ready artwork of your logo or special characters and we can cast them directly into your plaque, no additional charge! Our precision casting process allows for even the finest details.

Bas Relief Sculpture

The ultimate in premium photo or graphic reproduction. No other process can create the same rich detail our artists achieve by hand carving bas-relief patterns. Once completed, a sand mold is made to cast a metal version.

Raised Painted

Hand painted plaques and custom color matching is our specialty. We can paint your plaque to match exact specifications. Prices are determined by design and color requirements.

Add-Plate Plaques

Let us help you design a plaque that evolves over time. Names are cast on separate plates and added to the primary tablet as needed. Call us with your requirements and we can design it!

Dual Post Mounting

Dual post sign mountings provide for unique site directional and identification solutions. See our post, base & decorative cap options on pages 17 & 18. Call us and we can design it for you!

Choose from a variety of Globe Options
Available on our website
SHOPsignaturescapes.com

Polycarbonate

Recommended for use with High Intensity Discharge lamps. Polycarbonate has a high impact resistance and durability, making it less likely to be damaged or vandalized. Over time, globes will become yellowed compared to acrylic.

Acrylic - Impact Modified

Unsurpassed resistance to weathering and aging. Acrylic has an exceptional brilliance, which does not diminish even after prolonged use. Globes are made from a harder material which makes them more prone to damage or vandalism compared to polycarbonate.

Traditional HID Light Sources

Incandescent *Standard Socket - no additional charge*

Fixtures come standard with an incandescent socket for 110 volt electricity unless otherwise specified. Incandescent bulbs are rated for up to 1,000 hours of use.

High Intensity Discharge (HID)

High Pressure Sodium

Produces a golden-pink cast, it is the most efficient commercial light source. Bulbs are rated for 24,000 hours of use. Available in the wattages shown below. Capital Fitters & Mogul style bases come with harnesses for assembling ballast kit to lamp. Consult with your electrician for proper installation or call our customer service department for details.

70 watt	100 watt	150 watt
HP-070	HP-100	HP-150

Metal Halide

Produces a pure white light with excellent color rendering. bulbs last six times longer than standard incandescent bulbs. bulbs are rated for 10,000 hours of use. Available in the wattages shown below.

70 watt	100 watt	150 watt
MH-70	MH-100	MH-150

“Ring of Fire” LED Lighting

Energy efficient lighting at its best..

Ring of Fire

Decorative Ring of Fire

Ball of Fire

Description

The LROF post-top fixture utilizes our patented thermal integrated trim ring for maximize heat dissipation. Available in multiple wattage and distribution versions, this fixture is able to replace existing 175W-250W HID's one-for- one. Each model delivers superior lumen output to illuminate your next downtown lighting project.

Dimensions & Weights

Technical Specifications

Input Voltage: 120-277V or 347-480V

Light Distribution: LEDs are mounted to the inside of the fixture trim ring which serves as a heat sink to ensure optimal heat dissipation. This type of mounting allows for both Type 5 (standard) and Type 3 light distribution patterns to be offered.

Globe: Our two-piece acrylic or polycarbonate lens post top features precise prisms achievable only through injection molding. The prisms provide pleasing daytime “prismatic sparkle” and provide excellent uniformity, light distribution and efficiency for nighttime performance.

There are also two options for limiting uplight that is emitted from the fixture. The perforated light lid is a polished reflector above the LEDs that limits uplight to approximately 30% in the upper globe. The cutoff light lid is a solid polished reflector that virtually eliminates light to the upper globe.

Add some
Decorative Flare
to Your Community

Fitter/ Base: Fitter options are compatible with 8” or 9” globe neck sizes and are designed to slip fit 3” or 4” OD poles. *Fitter capabilities differ depending on the model selected.

Decorative Struts: Decorative struts require the use of a fitter/ base option.

Effective Projected Area (EPA): 1.40 ft squared

Color Temperature: 2700K WW, 400K NW (standard), 5700 CW. All LED's are rated for a minimum of 100,000 hours of continuous operation at ambient temperatures from -40F/-40C to 95F/35C.

Color Rendering Index (CRI): Minimum of 70 or higher.

Dimming: 0-10V standard dimming capability.

Surge Protection: a 20kA surge suppressor is included and complies with IEEE/ANSI C6.41.2 guidelines for “C High”. Surge location rated Category C3.

Lumecon ETD System: The enhanced thermal dissipation system engines are thermally bonded to provide maximum thermal dissipation to the exterior of the fixture to ensure long life. To protect the light engine panel from moisture and corrosion, the LED light engine panel is uniformly coated with a UV stabilized acrylic polymer resin that meets MIL and ASTM dielectric standards, UL and IPS standards for flammability, moisture resistance and thermal shock.

Performance Data

Watts	Equiv.	Lumens
27	175W HID	2370
54	175W HID	4692
58	250W HID	4574
84	250W HID	6809
88	250W HID	6240
113	250W HID	8426

Engineered to optimally perform in “Main Street” applications

- 20 kA Surge Suppressor Technology
- Acrylic lens will not yellow for up to 20 years
- Industry Leading 10-Year All-Parts Warranty
- 20-Year Luminaire Lifetime
- ETD (Enhanced Thermal Dissipation) System
- Customizable ring colors and accessories available
- Custom tooled prismatic lensing provides a uniform distribution of light
- Ideal for lighting main streets, residential communities, walkways and parks
- Available in three color temperatures: 3000K Warm, 4000K Neutral (standard), 5000K Cool

10-Year

“Ring of Fire” LED Lighting

Energy efficient lighting at its best..

LUMECON ETD™ SYSTEM

The Lumecon High Output LED Light engine utilizes the Lumecon ETD™ (Enhanced Thermal Dissipation) System. The ETD System Engines are thermally bonded to provide maximum thermal dissipation to the exterior of the fixture to ensure long life. To protect the light engine panel from moisture and corrosion, the LED light engine panel is uniformly coated with a UV stabilized acrylic polymer resin that meets MIL and ASTM dielectric standards and UL and IPC standards for flammability, moisture resistance and thermal shock.

LED LIGHT COLOR / QUALITY

The High Output LEDs come standard in 4,000k Neutral White, with additional options of 2,700k Warm White and 5,700k Cool White on the Kelvin temperature scale. All are rated for a minimum of 100,000 hours of continuous operation at select ambient temperature ranges. Contact your Lumecon sales agent for product specific specifications.

20kA SURGE PROTECTION

A 20kA surge suppressor is included to provide an additional level of protection against power line disturbances in industrial and commercial applications. Complies with IEEE/ANSI C62.41.2 guidelines for “C High.”

Showcasing the Decorative LED Ring of Fire

Lighting Posts

ACCESS DOOR

The machine cut electrical access door is provided as a hand-hole opening for an electrician to make wiring connections after the street lamp is securely installed onto a concrete pylon or direct buried. Once wires are connected, the gasketed, weather-resistant cover fits over the opening and fastens using (2) 10-24 x 3/4" tamper-resistant stainless steel button head machine screws.

Signature Streetscapes' aluminum surface mounted poles are constructed by combining solid cast aluminum "Bolt Bases" and our extruded aluminum posts (see page 15). Our certified welders fabricate each light pole to order before applying a durable powder-coat finish. Each pole is custom built to order and can be fitted with a variety of options including electrical access doors, photo controls, decorative tenons and more (see page 38 for options).

THINGS TO CONSIDER WHEN BUILDING YOUR POST

- ☒ Access Door
- ☒ Decorative Base
- ☒ Reducer Tenon
- ☒ Photo Control / Outlet
- ☒ J-Bolts For Mounting
- ☒ Grounding Rod

Surface Mount Posts

Designed to be used when pole is mounted above grade and fastened with anchors or "J-bolts" in concrete. Fasteners are cast integral with foundation. Call ahead and we can send a hole placement template to match the bolt patterns on our surface mounted bases for use when pouring concrete footers.

Lighting Components & Accessories

9" MOGUL FITTER

Sand cast decorative aluminum housing. Fits globes with 9" neck and 3" OD poles. Includes porcelain 4KV pulse rated mogul base socket.

8" COLONNADE FITTER

Sand cast decorative aluminum housing. Fits globes with 8" neck and 3" OD poles. Includes porcelain 4KV pulse rated E40 lamp holder.

DUAL HEAD ARM & WALL MOUNT BRACKETS

Made of aluminum, and available in either raw or gloss black finishes. Accepts both "Mogul" & "Colonnade" fitters.

LUMINAIRE FINIALS

Decorative fleur-de-lis and spear finials made of cast aluminum with a powder-coat finish. Comes with mounting hardware.

DARK SKY REFLECTOR

High downlight efficiency and low uplight levels. Fits most standard globe styles. Easy to install self collapsing design ideal for retrofits.

CNC Routed HDPE Signage

Signs are created with HDPE (High Density Polyethylene) sign board material in 1/2" or 3/4" thickness, depending on the application. The durable textured finish resists scratches and marring. HDPE material is UV stabilized to resist deterioration in harsh outdoor environments. In addition, HDPE is impact resistant, and will not chip or dent like other materials. Signs are created by removing the skin of the outside layer to expose the core color within. Choose from our 10 standard color options on the next page. Several choices are also available for incorporating your special graphics, logo, or custom coloring, see below.

It pays to go green...

Our recycled plastic HDPE signs are made from 95% up to 100% recycled plastic materials (milk jugs, bottles, etc.). Our HDPE has also been proven to last over 20 years in harsh outdoor environments. Less maintenance and a longer lifespan, what more can you ask for!

Signs are created with HDPE (High Density Polyethylene) sign board material in 1/2" or 3/4" thickness, depending on the application. The durable textured finish resists scratches and marring. Wayfinding / Post & Panel Signs

Panel Adapter Series

Features & Benefits:

- Pre-painted dark bronze exterior finish
- Simple to assemble
- Panel adapter allows for choice of 1/8", 1/4" or 1/2" panels
- Three reveal settings to choose from

Panel Adapter Series Includes:

- (2) 95" posts, choose from series 1, 2 or 3 profiles
- (2) Post Caps with mounting screws
- (1) Panel Adapter cut to size depending on sign dimension
- (1) "Reveal" cut to size for filling below sign panel
- All screws and mounting hardware required for assembly

Sign panels not included in kit prices, call for information regarding the design and size of sign panels required

Custom Printed Signs & Banners

Custom Printed Sign Panels

Signature Streetscapes has in-house capabilities to print full color UV resistant vinyl. Our wide format thermal printers produce high quality exterior grade vinyl signs that are rated for a minimum of 5 years of outdoor use. See below for more information on the type of substrates we use to create your custom signs.

Alupanel & Aluminum Substrates

Alupanel is a two-sided pre-finished aluminum composite panel consisting of two 0.30 mm aluminum sheets laminated to both sides of a black polyethylene core. Lightweight and strong, we can custom cut nearly any shape or size to fit your needs. A variety of vinyl cutting and printing techniques can be used to create your graphics. Aluminum sign panels are also available in a variety of thicknesses, call for information and prices.

Best Products, Best Prices - Signature Streetscapes uses only premium materials and stainless steel hardware that ensure your products will perform with little to no maintenance. Durable and attractive design options increase curb appeal and home values. With our extensive manufacturing capabilities we actually make the products we sell. This allows us to control all aspects of the product including quality, price & delivery.

Knowledgeable Customer Service - When you call our offices, you will be greeted by friendly sales agents that know the products and can answer all your questions. In most cases the people you speak with are also directly involved in the manufacturing, handling and shipping of the products you order.

Discounts and Bulk Order prices - We offer additional discounts on large orders, bulk items, and raw castings. Call our customer service department for more information on how we can help you complete your project and save you more than a few bucks in the process.

Our experience with Signature Streetscapes has been very positive and pleasurable! My husband and I decided we needed an original conversation piece to add to the office that is now themed after The Beatles. We thought a real street sign that read Abbey Road and Penny Lane would be really cool. The street sign and post look amazing! First I would like to say what a pleasure it was working with Steve from Signature Streetscapes. He was very friendly and helpful throughout this whole process of ordering the sign/post. Also, the sign and post are of the highest quality. The care that was taken in protecting and shipping the product was outstanding, and the powder coated paint was exceptional. It was very easy and fast to assemble. I would highly recommend this company for its products, quality and excellent staff!

Erin Forsyth
Another Happy Customer

"The streetblades have been installed and they look fantastic! The service, quality and delivery exceeded our expectations, I highly recommend your firm for all streetscape needs. Many thanks for everything, we look forward to doing business with you again in the future."

Dennis Luster, L.C., CSLT
Facility Solutions Group

Signature Streetscapes was fantastic to work with and I highly recommend them to anyone who is looking for the highest quality bronze plaques. Steve and the SS team were incredibly professional, friendly to work with and delivered our entire project under budget and faster than expected. I look forward to working with them again in the near future!

On behalf of the Walnut Ridge Association, I would like to express my appreciation for the excellent service you and your staff provided with both of our recent orders. I can honestly say the customer service that you provided throughout the entire ordering & delivery process of your high-quality products was exceptional. I would not hesitate to recommend Signature Streetscapes to anyone who is looking for a distinctive look for their property.

Our experience with Steve Snuffer and Signature Streetscapes signage has been a huge success for our city. Our residents have expressed positive compliments about the look and quality of the product. The entire process was smooth from conception and ordering to manufacturing and receiving of finished products. We will continue to use them on future projects.
